

FALL NEEDLE DROP

TREES AT RISK:

- All, very noticeable in some pines

IMPORTANT:

- Be aware of potential needle loss (some years may seem more than others) during this time, this is normal

WHAT TO LOOK FOR:

- In September – October (Fall)
 - Yellowing of inner/oldest foliage of the branches
 - Needles fall off of branches at or before harvest time (around November)

RECOMMENDATIONS:

- Nothing is needed this is a normal process by the tree no way to avoid/prevent/hide it

COMMONLY CONFUSED WITH:

- Air pollution
- Various needlecast diseases
